

Cookware Abrasion Tester

Model: SR-175

Summary:

Cookware Abrasion Testing Machine, Pot Surface Wear Resistance Tester is suitable for various cookware surface coating abrasion resistance test. Under certain load test medium friction with the sample after a certain time to determine the effect of the abrasion.

Features:

- ◆ Large-screen LCD design, touch screen operation, Can be arbitrary set test time, intuitive actual test time
- ◆ Multiple clamping methods and various way of abrasion, allows you to test accurate and productive.
- ◆ Double motor works, one motor drives the test sample to move back and forth, one motor drives the friction cloth to rotate

Meet test standards:

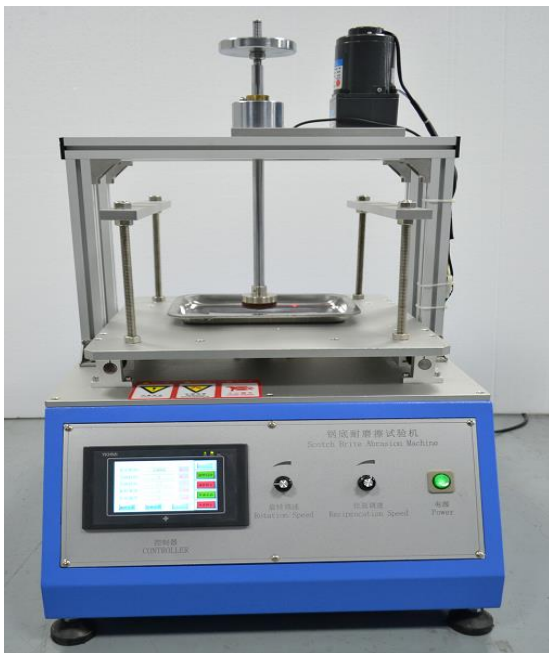

GB4706.5, JISC9215, BS 7069,

BS EN 12983-1, BS 1859:1976, BS 4083:1981, BS 4861:1973, BS 5206:1975

Specifications :

Tooling	special grinding cloth
Test load (g)	908, 1219, 1500, 4500, 4900g
Test time	0-9999 hours 59 minutes 59 seconds,can be set
Test stroke	52.7mm or customized
Test head diameter	50mm or customized
Machine size	500*500*600mm
Machine weight	About 60KG
Power supply	220V 5A or customized

Professional packing

We have professional packaging teams and shipping forwarder to pack and deliver your products safely!

- ❖ Out packing: Standard export wooden case.
- ❖ Inner packing: With careful stretch film wrap products, hard wood board + strong bandage to fix corners.
- ❖ Checking teams: Specialized staff to inspect and classified your goods.

What we produce? (always accept customize)
