

Pneumatic Button Life Tester

Model: SR-210

Summary:

Pneumatic key life testing machine is widely used to test the service life of various keys and keyboards. Use the cylinder drive to drive the keys up and down, so that the keys or the keyboard and the probe generate relative motion. Good clamping way, so that your test accurate and productive head can be moved in all directions, touch screen control, accurate count, automatic stop when reaching the set number

Features:

- ※ Good clamping way, so that your experiment accurate and productive
- ※ The probe can move in all directions
- ※ Touch screen control, accurate count, automatic stop when reaching the set number
- ※ The modes of sorting and same time clicking test can shift, and can simulate the mobile phone' s normal working condition;
- ※ Adopt precise pneumatic component, hitting-strength is adjustable and long lifespan.
- ※ Adopt touch screen display and PLC program controller.
- ※ Can test two samples in the same time, any directions of the grips is adjustable, can satisfy to test keys toke of different kinds of products.
- ※ Can satisfy the testing of backside and front side , with click strength calibrating system which can response the anti-clicking ability of key stoke.

Applications:

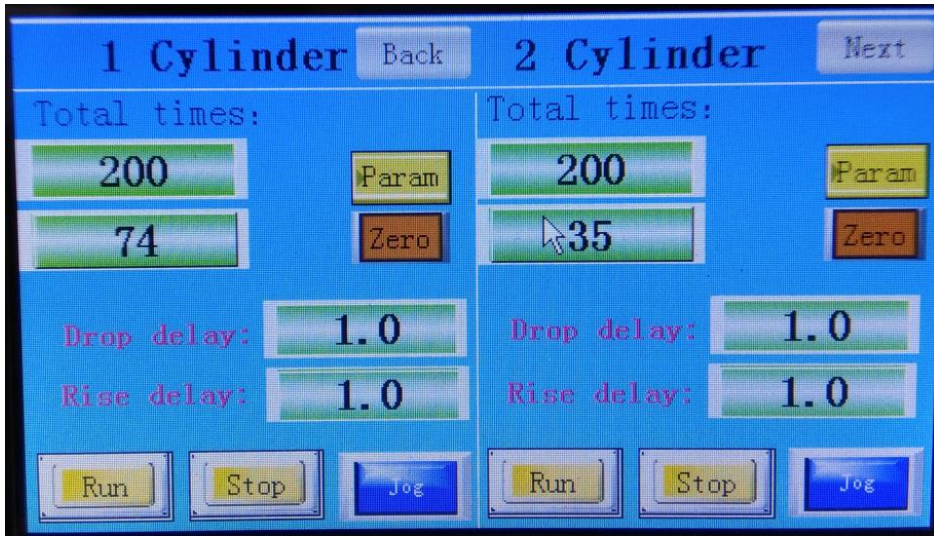

Apply for key stroke life-Span test for mobile, telephone, car entertainment devices, PDA, Bluetooth / Earphone, Automobile TV remote controller, MP3/CD and so on.

Specifications :

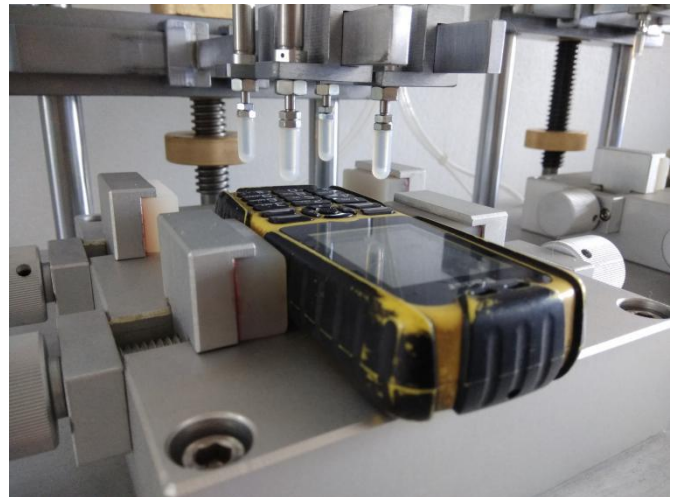

Model	SR-210
Test station	1, 2 (optional or specify)
Control	Touch screen control, easy and convenient
Motion pattern	The cylinder drives the head to move up and down
Test sample thickness	10~50mm
Test speed	10~60 times/min
Clamping	Both side of lower cover
Height adjust	Manual adjustable
Machine size	500×450×520mm
Power	220V 50Hz

Real imagines:

Touch screen controlled
 Digital display
 Can set the testing data on the touch screen
 Should “Zero” before testing

Every station has 6 compress buttons
 It can adjust the button distances according to different samples testing.
 This tester and test different buttons as following picture shows
